

Learning Facilitator: Alastair Gumley believes that it's not what you're taught that matters, it's what you learn! A classroom teacher, KLA Leader, Professional Development Co-ordinator in Learning Technologies and a VCE teacher, he provides a focus on the practical realities of the classroom and the extension of ICT into everyday teaching.

SUPPORTING

It's not what you are taught that matters – it's what you learn!

Students are the most important customers in our schools and universities. They are not dependent on us. We (the teachers) are dependent on them. They are not an interruption on our work. They are the purpose of it. They are not an outsider to our endeavours. They are a part of it. We are not doing them a favour by teaching them. They are doing us a favour by giving us an opportunity to do so. (Apologies to M. Gandhi)

Professional
learning

Professional Learning for Teachers

- Assisting, reflecting and challenging workplace learning
- Learning through Practice and Play
- Developing Effective Professional Learning Styles
- Structured, flexible and negotiated
- Facilitating informed decision-making
- Authentic, interwoven, articulated and practical!

Styles of Learning Delivery

- Workshops
- Breakaway Groups
- Seminars
- Full-day programs
- Mentoring Meetings
- Resourcing
- On-line, Flexible and Self-paced

Active Outcomes

- Building professional learning teams
- Supporting action research
- Examining student work
- Developing communities of practice
- Facilitating case discussion
- Learning-by-doing
- Bringing positive change through reflection
- Assessment for Learning

Professional Learning Programmes

- Podcasting and Vodcasting without Pain
- Feeding-back – e-Assessment for Learning
- Differentiating the Curriculum - MI Online
- iAdventures - WebQuests with Attitude
- Dialling to Learn – Mobile Phones and Learning
- Blended Learning – Opportunities for Online Learning
- Light Literature – 60 Second Drama
- Flash Fiction Through Blogs and Podcasting
- Others on request ...

Professional learning – embedding thinking skills in active on-line discovery

CONNECTING YOUR LEARNING TO THE TECHNOLOGY RESOURCES YOU NEED

Created your own WebQuests or miniQuests? Found them lacking in that special something? If you have (or haven't), there are still other ways of creating Internet activities that challenge students to deal with authentic learning scenarios!

An iAdventure will allow students to choose the direction and resolve the eventual outcome of an investigation - usually starting with a dilemma - using Internet resources you find, based on primary resources and (where possible) real-world data and documents.

adapting technology for educational needs

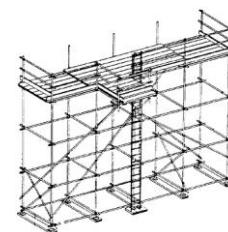

SUPPORTING LEARNING AND TECHNOLOGY

THINKING ON-LINE – LEARNING “IN” TECHNOLOGY

- 🔗 creating an immersive learning environment
- 🔗 encouraging students to use HOTS - Analysis, Synthesis, Creativity, Evaluation and Production
- 🔗 modelling discovery and PBL
- 🔗 focusing and enriching student engagement
- 🔗 motivating independent decision-making
- 🔗 creating opportunities for collaborative learning
- 🔗 developing essential questions
- 🔗 collecting, analysing and organising information
- 🔗 communicating ideas and reasoned opinions
- 🔗 planning and managing projects

PROFESSIONAL LEARNING: TEACHING AND LEARNING WITH TECHNOLOGY

- 🔗 explore the ideas of online learning and developing cognitive scaffolds to challenge students
- 🔗 develop a practical understanding of WebQuests, iAdventures, miniAdvents and miniQuests
- 🔗 use your valuable experience as a teacher to develop your own ideas in your own contexts to develop successful online learning outcomes
- 🔗 design and create your own iAdventures and miniAdvents for your classes
- 🔗 become the driver and not the mechanic through a hands-on approach to online teaching and learning
- 🔗 access on-going teaching and learning support 24/7

effective professional learning:

Using WebQuests, miniQuests, iAdventures and miniAdvents you can develop dynamic online activities and environments in which learners will be faced by two (or more) sets of conflicting evidence and the need to make either a reasoned choice between outcomes, or a novel resolution of the competing ideas.

Problem-solving and thinking activities with pizzazz ... as well as direction!

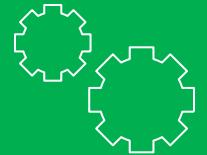

LEARNING PROVIDES
... THE MEANS TO AN END.

WebQ?s

what you will learn

training and resources for creating on-line thinking activities, including design templates, web site creation, assessment strategies and technology immersion

- ✓ using your learning time effectively to “play”, explore and investigate
- ✓ supporting your continuous learning and the search for professional leadership.
- ✓ mentoring, sharing and refreshing your practice through:
 - ✓ training that values your experiences.
 - ✓ focusing on learning-to-learn and on teaching- to- teach.
 - ✓ integrating ideas, people and learning.
 - ✓ creating communities of learning.
 - ✓ initiating leadership through innovation.
 - ✓ supporting professional learning teams

TEACHING SOLUTIONS NOT IT

Sometimes in education, it is the tail that can wag the dog! And so it can be with Technology, where the curriculum tends to be secondary to the means of communication. Teachers need to feel comfortable and adopt strategies that support and extend their capabilities -- putting learning before technology!

LEARNING SUPPORT

It is often easy to close the classroom door and create a supportive but essentially private learning environment. Technology will open that door and classes will become that much more publicly accessible and publicly accountable whether or not that is the intention – the chalkboard duster has gone.

As teachers, just as much as students, we need a supportive environment in which to build a professional confidence in the use of innovative technology to encourage both accessible teaching and learning.

ELEARNING SOLUTIONS

One size does not fit all! Teachers and learners need to recognise that e-learning is still learning, whether it is YouTube, Twitter, MySpaces, Facebook, Moodle, VLE, PLE or SLE. The teacher and the learner need to select their use of technology wisely to enhance their mutual purpose.
